In case of urgent medical need contact your GP
or DIAL 000 FOR EMERGENCY ASSISTANCE

LINCS Healthcare provides the link between hospitals to home to residential care facilities and community services.

We offer a range of nursing and allied healthcare services with reliable service provision and, if preferred, by appointment.

The experienced staff includes Clinical Nurse Consultants, RNs, EENs and PCWs who undergo comprehensive employment procedures including police clearance checks and ongoing education and training.

LINCS Healthcare is committed to a quality service, delivering safe practice that is supported by our own policies and processes.

Services are available 7 days a week including on-call service accessibility for staff and clients.

MISSION STATEMENT

To empower others to reach their optimal potential through the delivery of innovative healthcare.

LINCS Healthcare is a private Nursing and Personal Care provider specialising in the delivery of quality, innovative and reliable care across a range of settings.

A key feature of our service is to provide comprehensive nursing assessment, including referrals to community-based services for ongoing care, if required.

The team incorporates:

- Clinical Nurse Consultants
- Registered Nurses
- Endorsed Enrolled Nurses
- Personal Care Workers
- Health Sociologists
- Administration Officers
- Counsellors
- Consultants

LINCS Healthcare is committed to providing quality service and delivering safe practice.

LINCS Healthcare's full range of Clinical services includes:

- Care planning and assessments
- Medication administration and monitoring
- Palliative care
- Stoma care and complex wound-care including negative pressure dressings (VAC)
- In-home IV antibiotic service
- Management of PICC lines and infusion delivery devices
- Blood glucose level testing and diabetic management
- Continence management and IDC care

Other services include:

- On-call after hours accessibility to a Clinical Nurse 24/7
- Seamless and timely transition from hospital to home to community
- Referrals 7 days per week
- Responsive service delivery (usually within 24 hours)
- Potential to reduce non-urgent hospital presentations
